2015 is underway, and as we move through sensitive Pisces into the strength of Aries, it's a great time to make psychic connections in our own lives, and prepare for new phase of action and growth.

In this month's issue, we present some wonderful ways to see and connect with spirits. Spiritual energies are all around us, and by tuning into them, we can find clarity and inspiration!

We also give some tips on how to date an Aries. This is one of the most inspiring signs out there, and Aries partners can bring untold rewards. They do, however, present a unique set of challenges. The more you know about dating this fire sign, the more amazing your relationship can be.

Finally, who doesn't love Jon Bon Jovi? He was one of the biggest rock stars of the 80s and 90s, and simply refuses to leave the spotlight as he enters his 53rd year. We examine his psychic profile, and explore how his humble and romantic nature is balanced by a truly powerful presence.

Our featured reader this month is Anne. Popular with clients, she is a Metaphysician and Psychic Medium, and uses Tarot cards to facilitate strong connections to Spirit.

We look forward to bringing you renewed clarity and inspiration as we move into Spring, and thank you from our hearts for making us the most respected psychic service in the U.S.!

Love and Light,

Lauren X

On the Vibe

Crystal Clear Psychic **Anne** combines **sheer psychic talent** with **Tarot cards** to form a link with Spirit.

When did you first discover you were psychic?

I always knew there was something different about me. I would look at people and just know things about them. It wasn't until my second child started school that I really began to explore my gifts. I have always had Tarot cards and would play with them with make-believe that people were communicating with me. I now know they were spirits, but I couldn't yet see them.

What are your talents and what do they mean? I.e. Clairvoyant?

I am a Metaphysician and Psychic Medium whose first love is Tarot cards. I am also a Reiki Master and Pellowah Healer. I use my Clairvoyant skills to invoke my Spirit Guides and Angels to help me read the cards for my clients and connect to the spirit world. I always do my best to connect with deceased loved ones and pass on loving messages from the spirit world.

What tools do you use and why? What is their history?

I have many Tarot decks for all different occasions, but I always go back to my original deck, which means the most to me. They are looking quite worn and some even have pencil marks from notes being written on them. I also use my Pendulum and Angel cards, to which I have strong attachments. I cleanse my tools after each reading, so they are ready to go for the next task.

One remarkable story from a recent client?

I had a client who recently lost a son. Through messages from Spirit, we established that he was coming through to her as a crow that she constantly saw at her kitchen window. Whenever she went out, she constantly saw crows. She went on holiday to New Zealand, and while she was away, a crow smashed into my windscreen as I was driving. I noted the date and time. When she returned from her holiday, I learned that at the moment of my mishap with the crow, she was having a psychic reading with another reader who was connecting with her son.

Why do you enjoy working for Crystal Clear Psychics?

I love working for Crystal Clear Psychics because everyone is so lovely and very professional. Each client is special and treated with respect. We are all here working for the client to love and look beyond the light!

BON JOVI

The soaring, raspy voice. The torn trousers. The blonde locks and finely-chiseled features. There was no artist like Jon Bon Jovi in the 1980s. By the time *Slippery When Wet* hit shelves in 1986, he was one of the biggest rock stars on the planet, with sold-out stadiums and platinum records to prove it.

Sure, there were other big names in that decade—but how many remain as popular and active nearly thirty years on? Jon Bon Jovi still sells out arenas. Not only that, his acting skills have earned him diverse roles in film and television. He is active in philanthropy and politics, and despite turning 53 years old this month, he shows no signs of slowing down. So where did all this youthful bravado come from, and how on earth does he sustain it? Let's take a look at his psychic profile to find out.

AT THE TRIBECA
FILM FESTIVAL

♋ 虎

John Francis Bongiovi was born in New Jersey on 2nd March, 1963. This makes him a Pisces under the Chinese sign of Tiger—a combination which perfectly positioned him to become one of the world's greatest heartthrobs. Sensitive and deep, Pisces is the quintessential romantic. At the same time, Tiger gives an aggressive, confident sheen to Bon Jovi's personality and physical form.

In keeping with this sensitive bad boy image, Bon Jovi was never much for school. He cut classes often, preferring to play local gigs with his friends, and spend time with his cousin Tony who owned a New York recording studio. It was in that studio, sweeping floors at the age of 17, that destiny took shape. When the artist Meco needed someone to sing on his *Star Wars Christmas* album, Tony recommended his cousin John for one of the tracks. The resulting track, "R2-D2 We Wish You A Merry Christmas," may not have been the sexiest start to Bon Jovi's recording career—but it was a start, and that was all he needed.

Jon's Tiger nature served him well in the years that followed. His first proper recording, a track called "Runaway," was turned down by a string of major recording companies. But the Tiger's thick hide made him determined to break through. A New York radio station finally picked up the track after a face-to-face meeting with Jon, and a recording deal with Mercury Records followed.

By the late 1980s, the kid from New Jersey was a global success. But what was it that filled the seats and kept records flying off the shelves? Jon's sensitive Pisces nature cannot be underestimated when looking at his ability to capture the hearts of fans. A highly psychic water sign, Pisces is known for emotional depth and romantic potency. These qualities are tangible in Bon Jovi's lyrics, voice and stage presence—especially since they are combined with the strength and charisma of Tiger. Bon Jovi can melt your heart with his soulful singing, but he also exudes confidence and power.

As it turns out, these qualities translate well to film and television. Pisces is the sign that best describes the film arts in general, and many Pisceans make good actors for their ability to submerge into character.

The noble traits of Tiger may be, more than anything, what keeps Jon Bon Jovi so active and relevant today. Taken by itself, Pisces is sometimes overwhelmed by success. But the Tiger brings a clear, sober sensibility to Jon's inner world. His marriage to Dorothea Hurley—his high school sweetheart—has produced four children and endured more than thirty years of global rock stardom. This has kept his image clean, and his stock high in the entertainment world—not to mention charity and politics.

The bottom line is this: If Jon Bon Jovi's creativity ages as well as his famous face, there is certainly much more to come from this enigmatic star.

HOW TO SEE

PREPARATION

You Are a Spiritual Being

One of the biggest blocks to spiritual vision is the idea that spiritual beings are separate from us—that we ourselves are not also spirits. This sense of separation creates an inherent block, reinforcing the subconscious idea that spirits are an idea, a myth, or something apart from ordinary life. The more we accept ourselves as spiritual beings, and realise that seeing spirits is an aspect of our own nature, the easier it is to make progress.

Release Fear

Most of us have been exposed to countless spooky stories in film and books. Spirits and ghosts represent the hidden, unknown aspects of nature. The idea that translucent beings can sneak up on us, and wreak havoc in ordinary reality, is entertaining and mysterious. The downside is that many people come to fear spirits. We associate them with negativity, and assume that their motives are less than honorable. The reality is, there are a plethora of spirits out there, and many are benevolent. Some are simply curious, and many want to help. It's no different from the range of human beings in the material world. Facing our own fear of the spiritual world is an important step toward opening ourselves up to healthy interaction.

Signs and symbols

Spirits don't always look the way we imagine, or communicate in ways we would consider ordinary. Have you ever been going about your day, and had a sudden thought that didn't seem entirely your own? Have you ever been thinking about a problem you're facing, and felt your attention turn to words on a poster or bits of conversation that seem related to what you're going through? Perhaps you've even lost an object inexplicably, and your entire day has been altered because of it. Spirits do not always appear visually, and they are very creative in how they approach you. The more we learn to sense their presence and feel their influence, the easier it will be to actually see them.

SPIRITS

PRACTICE

Change in the Air

Because spiritual bodies are not made of the same dense material as physical bodies, we often begin to see them as changes in the air. The thickness or texture in the air will waver, flicker or shimmer in subtle ways. We may notice slight distortion through the room, somewhat like a vapor cloud. This type of activity is almost always accompanied by thoughts or sensations that a spirit is with us. If our spiritual vision is open, we begin to see their bodies more clearly.

Sparkles and Spheres

Spiritual beings often appear not as human-like figures with faces and eyes, but as flashes and points of light. As such, it is all too easy to mistake them for mere reflections or glints of sunlight. But if you pay attention, and look closely, you'll see this isn't always the case. These spiritual manifestations dance and move of their own accord, and appear in a variety of colors. It's very common to see this type of spirit in photographs, often in scenes of nature or around people. Cameras can indeed play tricks, and not every irregularity is a spirit—but again, close discernment over time will clearly reveal the difference.

A Different Set of Eyes

Spirits do sometimes appear in plain sight, but more often, seeing them requires use of spiritual sight. Our centre of spiritual vision—often called the third eye, and known for thousands of years in a variety of cultures—lies in the middle of our forehead. It generates images and impressions that are invisible to our physical eyes. Many clairvoyants and professional psychics, when they speak of seeing spirits, are referring this "other" type of vision. You can learn to use it too! Meditation and visualisation help open the third eye, and facilitate the direct perception of spiritual beings. This is perhaps the most important part of developing spiritual vision, and can lead to clearer perception of spirits in physical reality.

ROMANCING THE FLAME

Aries knows how to stoke the fires of love—but if you're not up to the task, you might get burned.

1. Don't Hide Your Feelings

If you've ever been interested in someone, and dialed their number a dozen times before actually pressing the call button, you're probably not an Aries. To this sign, romance is a dish best served bold—so don't be afraid to tell them what you want, and don't be surprised when they come on like a freight train! When it comes to steady relationships, being cryptic and vague about your feelings is enough drive an Aries bonkers. They would rather have things out in the open. This decisive attitude doesn't sit well with everyone, especially in the realm of love. You may have to work with your Aries partner to help them understand your emotional style.

2. Bring Your A-Game

If there's one thing Aries is not, it's lazy and unmotivated. As a fire sign, and the very first of the Zodiac, Aries is all about action and growth. It loves to get there before everyone else. Hard work, bold action, and a steady supply of motivation are key. So if you tend to procrastinate or over-analyze, you and your partner will have some adjusting to do. Think of it this way: Knocking items off the "to do" list, like so many bowling pins, is one of this sign's great joys and talents. But in doing so, they can easily wear themselves out—and you in the process. You'll benefit hugely from your partner's get-up-and-go attitude, but there will be times in your relationship when you need to help them find a sustainable pace.

3. It's Not Broken, So Why Fix It?

When your Aries partner discovers something like they like—be it a restaurant, TV show or brand of cereal—don't be surprised if they want more of the same. Establishing a course, and repeating it, is this sign's way of freeing up energy for other pursuits. That's not to say you can't change your partner's habits—just don't expect it to be easy. Aries does not always want to relinquish the reigns on decisions that should be mutual—but once they see the light, they'll be 100% on board with you.

4. Be Positive

Your Aries partner is a natural born leader, and as such, he or she knows how to "rally the troops." In tough situations, don't expect this sign to throw themselves—or you—a pity party. With Aries it's all about finding a positive angle, picking yourself up, and trying again. This is one of the most wonderful, inspiring qualities Aries has to offer, especially in the context of love. Aries has a huge heart, knows what it wants, and does not give up easily. How much more romantic can you get?

5. Don't Take It Personally

Many of us prefer to avoid heated arguments—but to an Aries, butting heads is an effective way to solve problems. It takes us to the crux of the issue, and produces a direct outcome with no fussing around. Ruled by Mars (the planet of strength and aggression), Aries is a fierce competitor. This can show in even the smallest of things. But don't take it personally! Argument is seldom a personal attack for Aries. It's just the most direct route from A to B. Aries sees life as a series of challenges, and they can inspire you to meet those challenges in no short order.
